## RoHS Compliance Certification

**Date:** December 31, 2012

Parts manufactured by RAF Electronic Hardware meet the specific requirements of the EU directive (Directive 2011/65/EU of the European Parliament and of the Council of 8 June 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment) for the following banned substances:

- Cadmium (Cd)
- Mercury (Hg)
- Polybrominated Biphenyl (PBB)
- Lead (Pb) (per exemption 6)
- Hexavalent Chromium
- Polybrominated Diphenyl Ether (PBDE)

RAF Electronic Hardware would like to state that parts manufactured out of our aluminum, brass and steel are compliant under the EU RoHS Directive per exemption 6 – lead as an alloying element.

Parts manufactured out of stainless steel, nylon, phenolic and teflon are fully compliant with the directive and do not contain any deca-BDE or any other substances restricted by this directive.

Also, all of our plating codes are RoHS compliant with the following exemptions:

- -1 (Cadmium Commercial)
- -2 (Cadmium Clear Chromate)
- -3 (Cadmium Yellow Chromate)
- -6 (Gold Iridite)
- -9 (Alodine 1200)

You can be assured that we here at RAF will be able to insure a continuous flow of product and continue to maintain a high level of service to our customers.

If you have any questions or concerns, please contact us immediately at [RoHS@rafhdwe.com](mailto:RoHS@rafhdwe.com)
